Reduce glare with SATIN STEEL®

RUBBER DAM CLAMPS

48 WAYS
TO INCREASE VISIBILITY

FACT
Today's dental lighting is brighter and more intense than ever before. Yet most rubber dam clamps reduce visibility by reflecting this light back into your eyes, creating a blinding glare.

CHALLENGE
Finding a rubber dam clamp that increases visibility and is available in a wide range of sizes and applications is often challenging.

SOLUTION
Hu-Friedy’s Satin Steel Rubber Dam Clamps offset bright clinical lighting. Hand-crafted to absorb and dissipate light instead of reflecting it back, these matte-finish rubber dam clamps are available in 48 sizes to help you perform at your best.

The result is clear, with Hu-Friedy’s Satin Steel, you can experience a comfortable field of vision that’s easier on the eyes.

### RUBBER DAM KIT (RDKIT)
Basic items needed for rubber dam procedures conveniently packaged in a kit (also available individually).

Hu-Friedy also has a full range of accessories useful for rubber dam clamp applications including forceps, punches, frames, templates, and an organizing board (shown on right).

MOLAR RUBBER DAM CLAMPS (GENERAL)

UPPER MOLAR RUBBER DAM CLAMPS

LOWER MOLAR RUBBER DAM CLAMPS

PREMOLAR RUBBER DAM CLAMPS

How the best perform
Hu-Friedy
SATIN STEEL PROVIDES SUPERIOR STRENGTH & CORROSION RESISTANCE
EIGHT PEGS SECURELY HOLD VARIOUS SIZED CLAMPS

Slightly offset staggered jaws for odd shaped anteriors.

Slightly offset staggered jaws for shorter premolars.

Flat jaws and high bow for small lower canines and first premolars.

Flat jawed and high bow for small lower canines and first premolars.

Slightly offset staggered jaws for longer premolars.

Flat jaws for anterior teeth.

Flat jaws for upper right and lower left molars; paired with RDCM13A.

Flat jaws for lower molars.

Flat jaws for large molars.

Slightly festooned jaws for partially erupted or irregularly shaped molars.

Slightly festooned jaws for premolars.

Slightly reversed festooned jaws for upper left molars.

Flat jaws for large partially erupted or irregularly shaped molars.

Deeply festooned jaws for larger partially erupted or irregularly shaped molars; paired with RDCM30.

Deeply festooned jaws for partially erupted or irregularly shaped molars; larger than RDCM8A.

Flat jaws for upper right and lower left molars; paired with RDCM29.

Flat jaws for small upper molars.

Slightly offset staggered jaws for anterior teeth.

Slightly offset staggered jaws for small upper molars.

Slightly offset staggered jaws for large upper molars.

Slightly offset staggered jaws for upper right molars; paired with RDCM2A.

Deeply festooned jaws for premolars.

Flat jaws for long premolars.

Flat jaws and stiff bow for anterior teeth.

Slightly reversed festooned jaws for large upper molars.

Slightly reversed festooned jaws for large lower molars.

Slightly reversed festooned jaws for upper left molars; paired with RDCM2.

Slightly reversed festooned jaws for large upper molars.

Slightly reversed festooned jaws for small lower molars.

Slightly reversed festooned jaws for large lower molars.
